

Company Profile

At D&N Security Solutions, we provide you with peace of mind.

Our role is to identify potential situations, promote calm and above all, to ensure the safety of your staff, your customers and your property.

We supply security services to pubs, clubs, RSLs, shopping centres and private functions.

By delivering honest, open communication and personalised service, we focus on establishing a relationship of trust with our clients. We have the knowledge, experience and ability to handle a variety of situations, which promotes confidence with you, our valued clients, your patrons and staff.

We are trained in implementing safety and security protocols to keep any venue safe. Our team members set the scene by welcoming people to your venue, promoting an atmosphere of mutual respect, rather than intimidation. However, we are continually alert for any potential issues or incidents, using early intervention and putting a stop to an issue to maintain order.

Education is important to us. Our guards receive ongoing training to expand their skill set, update their knowledge of the latest rules and regulations, and assist them to adapt to a multitude of different situations which may arise.

D&N Security Solutions offer risk management assessments, where we do a site check for security hazards such as blind spots on security cameras, watching how your staff operates and what may make them vulnerable, and identifying hazards which patrons or staff may encounter, as well as theft prevention.

Other services include assisting with cash transfers, monitoring CCTV footage, identifying perpetrators when incidents do occur, assisting staff with day-to-day duties and supervising closing time at venues.

We hold a Master Security Certificate, Security License, RSA & RCG qualifications and First Aid certificates.

For safety, security and peace of mind, call Daniel or Rodney at D&N Security Solutions today.
